

S. Carolina Health Disparities: Prevalence of Influenza Vaccine (Within Past 12 Mos) Age 65+

Source: DHEC BRFSS

ETSSD, Bureau of Epidemiology, SC DHEC (March 2003)

- Percentage of people aged 65 and older who received influenza vaccination (flu shot) in the past 12 months increased in the past six years.
- Blacks have fewer people receiving flu shot than whites among people aged 65 and older.
